

Steps to Replace Safari 5.1 with 5.0.5 Snow Leopard

Currently Safari 5.1 is not a supported browser due to adobe plug-in compatibility. If Safari 5.1 has been installed with an operating system of 10.6.8, the browser of 5.0.5 Snow Leopard can be installed to allow for functionality.

Solution

1. Download and install the Pacifist Program. (See Link Below)
2. Download the safari5.0.5SnowLeopard.dmg file. (See Link Below)
3. Open Pacifist.
4. In the registration window select Not Now.
5. Select the Open Package... button.
6. Navigate to where the safari5.0.0Snowleopard.dmg file is located, and open the file.
7. Expand the file structure to find the Safari app under Applications as shown in the following.

8. Select the Safari App., and click the Install button in the upper left.
9. When asked if you want to update the existing bundle, select Update.
10. Upon completion, restart the machine.
11. Confirm that the Safari version has been updated to 5.0.5
